

A SUSTAINABLE FUTURE STARTS AT SCHOOL

Join our community of 100+ parents and teachers who help make elementary schools green, healthy, and just — one project at a time.

Address your school's pressing needs through a sustainability passion project!

Set up an outdoor classroom kit

Gather a student green team

Start a gardening or recycling project

Promote walking and biking

Build community or relieve staff

We'll help you make change.

Are you a parent who wants to help your child's school thrive but don't know how to use your limited time? Our online training prepares you to carry out a passion project that meets a critical need at your school and gets kids practicing sustainability.

- **Take our four-session online training** this February and March. In these live Zoom webinars, we'll help you identify the best project for yourself, engage others, and keep it going. A mentor will be there to make sure you have the tools and support to succeed.
- **Join our network of changemakers** from other schools and districts to get inspired by their innovation and see what's possible. You'll get no-pressure invitations to quarterly gatherings and retreats for ongoing learning, connection, and a heck of a lot of fun.
- **Choose your own adventure.** Your level of involvement is up to you: take on a simple project and be done, or start an ambitious initiative and participate in ongoing offerings. Either way, you'll have supported your school in a meaningful way and nurtured young stewards.

Spread hope through action.

Learn more.

Join our online information session on January 27th or February 1st at 7p.m.! Get the details by emailing jeanne@ecoschoolnetwork.org

Training is free for the first 50 people!
